

“DAILY ELECTIVE PROGRAM FOR 2017”

“We know that Staten Island Day Camp campers thrive within our diverse and innovative program, but we go the extra mile letting them choose their own daily adventure!”

- Our, “**Daily Program**” distinguishes us from any other Camp Program in Staten Island. Campers choose from several different electives, enabling them to customize and enjoy their daily schedule by participating in activities that they have a passion for learning and enjoying.
- Daily Elective periods are offered for our campers age seven and older. Our program continues to grow along with our campers, as each age level enjoys age appropriate instruction in order to satisfy campers’ growing sense of independence and exploration.
- Our electives highlight our camp’s core activities in *Sports*, *Creative Arts*, “*Invention*” and *Technology*. The following elective clinics are featured at Staten Island Day Camp!
BASKETBALL, DIGITAL MEDIA/PHOTOGRAPHY, SOCCER, HIP HOP, FLAG FOOTBALL, SOFTBALL/BASEBALL, CREATIVE ARTS, FASHION, AND CAMP INVENTION.
- Our campers will be able to express themselves and make their own decisions. By choosing their own daily adventures they feel empowered, build confidence, and discover hidden talents. Elective clinics are designed to offer campers specialized instruction in activities that truly inspire them. This choice-based programming gives campers the opportunity to enjoy their favorite activities and try out new experiences. Campers make all choices while in camp with the assistance of our counselors and their group mates. No matter what they choose, it is sure to be a fun-filled adventure!

Creativity Goes Into Overdrive at SIDC’s Camp Invention Clinic!

Did you know that said...
Camp Invention campers to a high energy traditional and their inventive

that the Popsicle, ear muffs, and the trampoline were all invented by kids? With SIDC feels the summer is a great time to foster some “out of the box inspiration.” is an exciting weekly clinic adventure that immerses cooperatively take on physical and mental challenges in way. Campers receive inspiration through a host of both untraditional supplies from the “camp tinker lab” as spirit is guided by the *SIDC Director Design Squad*.

This clinic will be based on the some of the principles of the Science, Technology, Engineering and Mathematics (STEM) project. Using everyday materials and products such as newspaper, paper cups, cookies, pencils, straws, spaghetti as well as many others, campers will design and “engineer” a creative and purposeful structure such as a bucket tower, a straw roller coaster and bridge,

The Camp Invention Elective will run one day per week for approximately one hour.
